E-Proctoring:
*Understanding
the debate
about invigilating
remote exams*

Back to the future

Interestingly, the debate is not entirely new. In [2018](#), [Rory McCorkle predicted more students would be taking exams remotely in the future](#). Welcome to 2020, where the Coronavirus has changed everything.

Students up in arms

[Math students at Laurier University were described as furious](#) after their department required them to buy external web cams for their exams. [Rebecca Heilweil shares the perspective of University of Washington student, Marium Raza, who shared concerns about the lack of transparency about how their recorded video will be used or who will see it](#). The heightened use of surveillance to monitor students' every move is a recurring theme in these stories.

Faculty disgruntled

Faculty are also concerned about surveillance and an invasion of students' privacy. References to George Orwell's [1984](#) have been made in more than one news article, such as [this one by Colleen Flaherty in Inside Higher Ed](#), and this one by [Shawn Hubler in the New York Times](#).

Michael Sankey of Griffith University has described the rapid move to e-exams as [driving headlong towards a cliff](#).

Glitches in the matrix

A recent [news story out of Australia](#) detailed how over 250 candidates taking a TAXAU120 required special consideration after their remote exam provider, ProctorU reported that they experienced “a [momentary connectivity issue](#)”, leading to them being disconnected from their exam.

Resources: Webinar Recordings

A couple of publicly accessible webinar recordings you might find useful are:

- [Academic Integrity in Online Exams](#) – This session was presented by Tod Denham and the team at Thompson Rivers University (TRU) Open Learning did for us at the University of Calgary.
- [Implementing remotely invigilated online exams at scale](#), presented by Kylie Day as part of the [Transforming Assessment Webinar Series](#) is also worth a watch.

Additional Resources

- E-CampusOntario – [ProctorTrack Instructor Support Guide](#) (open access pressbook)
- [Fourteen Simple Strategies to Reduce Cheating on Online Examinations](#) – Excellent article by Stephanie Smith Budhai

What the research says

For those interested in scholarly perspectives on the topic, a couple of journal articles worth looking up include:

- [Cramp et al. \(2019\)](#) – Lessons learned from implementing remotely invigilated online exams.
- [González-González et al. \(2020\)](#) – Implementation of E-Proctoring in Online Teaching: A Study about Motivational Factors

*“...an assessment culture
of **MEASUREMENT & GRADING**”*

*“...an assessment culture
of **LEARNING & DEVELOPMENT**”*

TURKEY Test Centres

Assessment

Look at the 5 options
on the poll.

Which statement is the
closest to your beliefs
on what assessment
SHOULD be about

“...an assessment culture
of **MEASUREMENT & GRADING**”

“...an assessment culture
of **LEARNING & DEVELOPMENT**”

Can you see a...

**BIG
PROBLEM**

...in all of this?

CULTURE

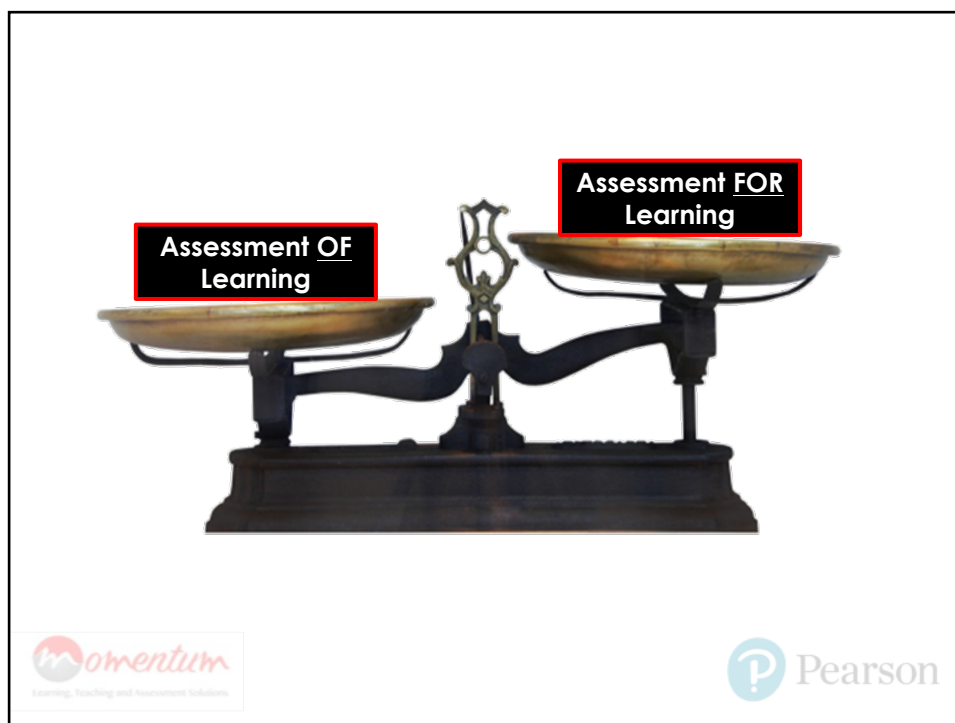

“...eats **STRATEGY** for breakfast”!

Peter Drucker

Gelelim... fasülyenin faydalarına

There are **ONLY two reasons**
for **assessment...**

One is to assign
a **score** or **grade**

The other is to **provide**
students with feedback on
the quality of their work &
specifically on **how they**
might improve that quality

Pearson

What does the **RESEARCH** tell us?

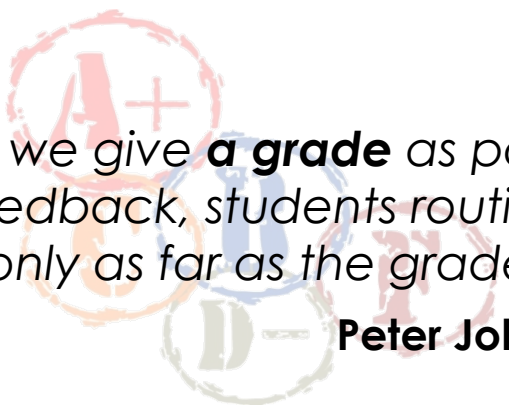

ASSESSMENT is a lot more important to learning than we previously thought.

ASSESSMENT is not just about 'tests' or 'weighing & measuring' our students.

ASSESSMENT can be used to change 'what' and 'how' students learn.

When we give **a grade** as part of our feedback, students routinely read only as far as the grade.

Peter Johnstone

Feedback is an opportunity not just to give students the answers, but to **check they understand why an answer is correct or not, or to clear up a long-held confusion, or to pick up on areas that need clarifying in a subsequent lesson.**

Rachael Roberts

If used meaningfully and well-managed, peer and self-assessment can improve students' understanding of a topic, enable them to support one another and have a huge impact on progress.

It can also drastically cut your marking pile – so, everyone's a winner!

Multiple studies have found that ***students who get letter or number grades - particularly those who have been led to focus on improving those grades - become less interested in learning, tend to think less deeply, and prefer the easiest possible task***, as compared with students who are not graded (but may receive informational feedback when needed).

Alfie Kohn (2019)

The Top 10 Factors for Student Achievement

1. **Student self-assessment/self-grading**
2. Response to intervention
3. Teacher credibility
4. **Providing formative assessments**
5. **Classroom discussion**
6. Teacher clarity
7. **Feedback**
8. Reciprocal teaching
9. Teacher-student relationships fostered
10. Spaced vs. mass practice

momentum
Learning, Teaching and Assessment Solutions

Pearson

“...a culture
of **TEACHING** & **SPOON-FEEDING**”

“...a culture
of **LEARNING** & **AUTONOMY**”

STOP giving so many ‘**graded**’ tests, quizzes
and silly **fill-the-portfolio** with ‘**crap**’ tasks!

START doing more **no-grade** / **non-scored**
‘**learning checks**’ and ‘**correction tasks**’
that raise awareness of **why** and **how errors**
crop up!

**Hadi ordan...
YEMEZLER!**

BUT...

Tony...if we don't give them **marks** or **grades**, they won't do anything!

RADICAL IDEAS

- Use more **assessment-FOR-learning** activities
- Encourage **reflection** and **self-evaluation**
- Use formal tests as opportunities for **real feedback**
- Get students developing **their own 'test' materials** from Day 01
- Let students see **the 'power' of feedback** (over 'grades')

- **Reducing the quantity** of assessment
- **Increasing the quality** of assessment
- **Increasing the diversity** of assessment instruments and processes
- **Balancing assessment OF learning** (summative testing) with **assessment FOR learning** (formative checks & feedback)
- Bringing students into the **'assessment culture of learning'**

Assessment is something
that teachers **do to** students
after learning.

Assessment
'OUTSIDERS'

Assessment is something that
teachers **do with** students **before**,
during and **after** learning.

Assessment
'OUTSIDERS'

Assessment
'INSIDERS'

How the hell are
we gonna do more
“assessment-for-learning”
and give more / better
“feedback” in a remote
classroom environment?

AMAZING IDEAS
...if you can manage to find the TIME!

- 1** **ONE-on-ONE video check-in** with each student for 5-10 mins (*once a week*).
- 2** **Mini-group video check-in and tutorial** – here you can differentiate on interests, readiness or challenges, if need be.
- 3** **Whole-group “town hall gathering”** – no teaching, a check in to gather feedback (“smiley face” surveys via mail / Google Docs).

The “Bottom” Line...!

Assessment is something that teachers **do to** students **after** learning.

Assessment is something that teachers **do with** students **before, during and after** learning.

Assessment 'OUTSIDERS'

Assessment 'OUTSIDERS'

Assessment 'INSIDERS'
